

Modernizing Your Workplace and Transforming Your Digital Services

CrucialLogics can help you build a modern workplace and achieve full digital transformation by onboarding all of your end users' devices. We will align your enterprise mobility management (EMM) needs with a unified endpoint management (UEM) solution.

80%

The percentage of workers that will use a mobile device for job related tasks by 2020.¹

75%

The share of smartphones in the workplace that will be BYOD by 2022.²

30%

The ratio of Windows 10 business PCs that will be using UEM tools or EMM software by 2022.¹

200,000

Modern workplace endpoints deployed and managed

Modernize and simplify your company's IT workplace and realize complete digital transformation by adopting Microsoft's System Center Configuration Manager and Intune. Benefit from an efficient Office 365 ecosystem for your end users by enabling them to work on any iOS, Android, Windows or macOS device. Integrating Intune with a System Center Configuration Manager solution will not only help you save on IT infrastructure costs it will also enable you to:

- Manage multiple mobile devices from the cloud while ensuring your data is protected and employee productivity is uninterrupted, no matter which apps they use.
- Modernize your workplace at your own pace without compromising control and boost your bottom line with a lower total cost of ownership.
- Control who can access which data, from which devices and how that information can be used, with IT security policies that separate personal and work data.

- Reduce IT security threats from the cloud by implementing innovative information protection protocols that use artificial intelligence (AI) and machine learning (ML).
- Eliminate the need for hands-on implementations. Windows Autopilot optimizes device setup by using mobile device management tools to remotely configure and manage devices.

Microsoft Intune can increase employee productivity by giving them easier and secure access to the devices, data and applications they need – where and when they need it.

MODERN WORKPLACE INTEGRATION: BENEFITS

What to Expect from a Modern Workplace Integration by CrucialLogics:

One Dashboard – Multiple Functions

- Save on infrastructure costs by managing multiple IT devices from one console for all-inclusive workplace analysis and support.
- Integrate Intune with System Centre Configuration Manager for better on-premise and in the cloud control.
- Organize the activities of endpoint technologies like IT security and identity services from a single platform.

Scalable Cloud Architecture

- Achieve maximum IT efficiency with a cloud service architecture that ensures your data and applications are always secure and up-to-date.
- Optimize user productivity by enabling them to access Office 365 and to install company applications from your cloud to their devices.
- Leverage your cloud for deep insights into your data and apps to establish baselines for your IT security policies and configuration settings.

Unified Data Protection

- Meet data security requirements and compliance obligations with baseline configuration and best practice IT security tools.
- Get Intune app protection protocols to manage and control Office 365 data usage on remote mobile devices.
- Unify data protection across your IT infrastructure to safeguard against hacks by unauthorised users.
- Benefit from file-level encryption with built-in protection for files that are active or dormant, with Azure RMS.

CrucialLogics is a Microsoft Gold Partner. We are seasoned experts in all things Microsoft and dedicated to deploying seamless, secure, comprehensive migrations without disruptions.
