

Building IT Foundations that Align with Planned Business Strategies

CrucialLogics can help you design your enterprise architecture to align your business processes with the best in IT solutions.

\$206 Billion

The projected price tag of the worldwide public cloud market by the end of 2019.¹

\$72 Billion

The estimated global value of the Infrastructure-as-a-Service industry by 2020.²

83%

The percentage of enterprise IT workload that will be hosted in the cloud by 2020.¹

1000+

The number of customers we have helped with their enterprise architecture.

Enterprise architecture is used by forward-thinking managers to establish an IT foundation matched to current and future business objectives. It is helpful in reducing risks, enhancing profitability and delivers a competitive advantage.

An effective enterprise architecture will:

- Provide a clear, long-term insight into your company's technology infrastructure and processes and a better understanding of your IT operations' capabilities.
- Bring your user demands and business results in line with your business strategies and corporate culture to ensure consistency and enable integration.
- Enable the growth of the solution portfolio and lay the foundation for quick and innovative adoption of new practices to meet the demands of today's dynamic markets.

- Evolve in response to IT security threats and ensure your technology infrastructure remains uncompromised and deliver a roadmap to transition from current state to target state.
- Create and maintain an interconnected, holistic solution that includes applications, processes, technology and data.

Enterprise architecture is a powerful management discipline to help you analyze, mobilize and optimize your technology assets.

ENTERPRISE ARCHITECTURE: BENEFITS

What you get from a CrucialLogics enterprise architecture solution:

Standardized Technology Protocols

- Simplifies procedures, as they are based on a singular enterprise architecture platform
- Standardizes protocols to ensure greater performance and seamless integrations
- Reduces costs by streamlining procedures, ensuring time is used more effectively

Intelligent Automation Solutions

- Supports robotic process automation (RPA) and artificial intelligence (AI)
- Boosts productivity, profitability and quality with increased security
- Enables real-time operations and supports employee productivity

Microsoft Azure IaaS and PaaS

- Provides cloud options for building, managing and deploying apps and services
- Supports various programming languages within your enterprise architecture
- Works with Microsoft-specific software as well as other third-party software

Microsoft Active Directory Service

- Provides a centralized directory of information stored on your network
- Supports systems administrators to manage complex IT network ecosystems
- Helps users easily find and utilize resources within your enterprise architecture

CrucialLogics is a Microsoft Gold Partner. We are seasoned experts in all things Microsoft and dedicated to deploying seamless, secure, comprehensive migrations without disruptions.
